SUMMARY

Computer Engineering student with experience building full-stack web applications using Next.js, TypeScript, Node.js, and MongoDB. Skilled in designing REST APIs, backend systems, CI/CD pipelines, and deploying production systems with Docker and cloud infrastructure.

EDUCATION

Thadomal Shahani Engineering College

September '24 – Present

B.E - Computer Engineering - CGPA - 9.76

Bandra, Maharashtra

Don Bosco School and Junior College

July '12 – April '24

Higher Secondary Certificate (HSC) - Percentage - 93.33%

Boisar, Maharashtra

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C++, Python

Web & Backend: Next.js, React, Vue.js, Node.js, Express, MongoDB, FastApi, SQLAlchemy, Prisma, Firebase

Tools & Platforms: Docker, Git, Github Actions, n8n, Vercel, VSCode

UI & Styling: Tailwind CSS, Shadcn UI, Chakra UI, Bootstrap, GSAP

EXPERIENCE

TSEC Devs Club

April '25 - March '26

Full Stack Developer

Bandra, India

- Redesigned the official organization landing page using **Next.js**, improving **Core Web Vitals (LCP/FID)** by **40 percent** and implementing **Lottie animations** for enhanced user engagement.

Saras Finance

January '26 - February '26

Software Developer Intern

Remote

- Migrated a **20k+ line production frontend codebase** from **JavaScript to TypeScript** single-handedly, defining reusable **types and interfaces** to enforce compile-time safety and reduce runtime errors.
- Implemented a **centralized Axios service layer** used across **40+ API endpoints** with **request/response interceptors** for HTTP-only token injection, **global error handling**, and retry logic.
- Revamped the frontend** of a core product, refactoring **30+ UI components** to improve maintainability.

PROJECTS

Self-Hosted Production Web Platform 🔗

December '25

[Next.js](#) — [Linux \(Termux\)](#) — [CI/CD](#) — [Cloudflare Tunnel](#) — [PM2](#) — [Webhooks](#)

- Built a self-hosted server on an old Android device** using a Linux (Termux) environment, eliminating dependency on traditional cloud infrastructure and **enabling 24/7 deployment automation**.
- Engineered an on-device webhook-driven CI/CD pipeline** that **automatically deploys every commit from GitHub**, reducing manual deployment steps from **5 minutes to under 30 seconds**.
- [GitHub Repo](#) [Blog](#)

Neura 🔗

September '25

[AI SDK](#) — [Supernemory](#) — [Next.js](#) — [SVIX](#) — [Prisma](#)

- Designed an **AI-powered navigation assistant** using the Vercel AI SDK, Prisma ORM and Supernemory to maintain persistent contextual memory across user sessions.
- Implemented an **event-driven architecture with SVIX webhooks** to visualize real-time journey data.
- [Github Repo](#)

ACHIEVEMENTS

- 1x hackathon winner** in KJSCE ACM AfterMath and **3x hackathon finalist**.
- Self-hosted infrastructure project gained **5,000+ visits within 24 hours**, handling up to **10 concurrent visits at its peak**, maintaining **99% uptime** in production.
- Ranked 1st** in HSC Class 12 and **2nd** in SSC Class 10 Board Examinations within campus.
- Ranked 1st in college** and **2nd at university level** in Semester 1 of B.E. Computer Engineering.
